

**Press Release
Master Plan Community Survey
For Immediate Release
October 1, 2024**

The Village of Lake Odessa Planning Commission has started the process of updating its 2018 master plan and is seeking input from residents.

A master plan is a document used in making land use and zoning decisions. It identifies challenges and opportunities the Village might face in the future. These issues could include housing availability, business attraction, parks and recreation facility development, natural resources preservation, and more.

Part of the data used in preparing the new master plan will come from a brief online citizen survey.

Lake Odessa utility customers will find information about the survey on the back of bills that were mailed on September 30. This information includes a quick response code that can be used to access the survey document from smartphones. The survey can also be found at www.surveymonkey.com/r/5t2v6rh.

The updated master plan is expected to be completed in mid-2025.

Residents with questions about the survey or the master plan are invited to call interim Village Manager Gregg Guetschow at (616) 374-8698.

For additional information, contact Village Manager Gregg Guetschow at (616) 374-8698 or manager@lakeodessa.org
